

CYRUS VHON S. OBOG

BSIT Student | Aspiring Web Developer
Los Baños, Laguna, Philippines | cyrusvhon1233@gmail.com
github.com/cyrus-vhon | cyrusvhon.netlify.app

PROFILE

Information Technology student who enjoys turning ideas into functional, responsive, and user-friendly digital experiences. Experienced in building websites, management systems, dashboards, and database-driven applications through academic, personal, and freelance projects. Working toward becoming a well-rounded developer who delivers reliable solutions to real-world requirements.

EDUCATION

Bachelor of Science in Information Technology (BSIT)	Present
Laguna State Polytechnic University – Los Baños Campus	

TECHNICAL SKILLS

Frontend: HTML5, CSS, JavaScript
Backend: PHP, Python, Node.js
Frameworks & Libraries: React, Bootstrap, Tailwind CSS
Databases: MySQL, PostgreSQL
Tools: Visual Studio Code, Visual Studio, GitHub, Figma

PROJECTS

CDLB Institutional Facility Management System

HTML, CSS, JavaScript, PHP, MySQL

- Web-based reservation system for the Colegio de Los Baños covered court with a live availability calendar, multi-court booking, and double-booking prevention.
Live demo: <https://cdlb-reservation.infinityfreeapp.com/index.php>
- Admin dashboard for approving or rejecting requests, blocking dates, managing users, and viewing reports.

TICORE: Barangay Court Reservation System (In Development)

React, Node.js, Python, PostgreSQL

- Court reservation system for Barangay Timugan where residents view availability, check schedules, and submit reservation requests.

Digital Wedding Invitation – Johndel & Klarisse

HTML, CSS, JavaScript

- Interactive single-page invitation with guest name entry gate, live countdown, event program, photo gallery, entourage list, dress code guide, and RSVP form with guest count tracking.
Live demo: <https://johndel-klarisse.netlify.app>

SERVICES & EXPERIENCE

- Freelance and project-based web and system development for clients and students from different schools.
- Development of authentication, database management, reservation, and administrative dashboard features.
- UI/UX and interface design focused on clean, intuitive layouts.
